

NOPSTER, INC.

Full-stack software development and systems integration — from custom applications to the pipelines and APIs that connect them.

UEI	Pending — SAM.gov in process
CAGE Code	Pending
NAICS	541511 — Custom Computer Programming Services
PSC	DA01 — Application Development Support Services
Business Type	Small Business, Minority-Owned (Asian-Pacific American)

CORE COMPETENCIES

- Custom full-stack web and mobile application development
- Systems integration & API development — connecting existing systems, data sources, and third-party services
- Microservices & RESTful / GraphQL API architecture
- Cloud infrastructure & deployment automation
- CI/CD pipeline design and implementation
- Ongoing maintenance, support, and feature development for production systems

TECHNICAL STACK

Languages	JavaScript, TypeScript, Java, C#, PHP, Python
Front-End	React, Next.js, Ember.js, Angular 2+, HTML5, CSS3, Sass, Bootstrap
Back-End	Node.js, Express.js, Nest.js, Java Spring Boot, REST, GraphQL, Microservices
Databases	MongoDB, MySQL, PostgreSQL, SQLite, SQL Server
Cloud	AWS (EC2, S3, Lambda, RDS), Google Cloud Platform (GKE, Pub/Sub), DigitalOcean
CI/CD	GitHub Actions, GitLab CI, Terraform, Docker, Kubernetes

PAST PERFORMANCE

Online Proctoring Platform

Wise Education Systems, Inc. | Node.js, Koa, MongoDB, React, Google Cloud Platform

Developed new front-end and back-end features for a production online proctoring application. Built and maintained systems on an ongoing basis, with continued engagement for support and issue resolution.

Mobile Video-Sharing Application

Keepsee | React Native (iOS), Firebase, Google Cloud Platform

Built new features for a mobile application enabling users to record and share video experiences with family and friends.

Commission Automation Platform

Stakt Commissions | Full-stack development, CI/CD, DigitalOcean

Built third-party integrations, backend services, front-end interface, and CI/CD deployment pipeline for a platform automating commission calculations and payouts.
